Re: *Ex Parte* Presentations in Docket MB 04-64, In the Matter of Digital Output Protection Technology and Recording Method Certifications: Digital Transmission Content Protection

Dear Ms. Dortch:

This is to advise the Commission that DTLA has granted approval for the persistent protected storage of content that has been protected using DTCP ("DT Data"), including digital terrestrial broadcast television content marked with the Broadcast Flag, to the Vidi Content Protection System ("VCPS" or "Vidi"), licensed by Koninklijke Philips Electronics N.V., and that DTCP Adopters therefore may store DT Data using the VCPS technology pursuant to the DTLA Adopter Agreement Exhibit B, Part 1, Section 2.2.1. That technology has been certified by the Commission for use as a recording method in *In the Matter of Digital Output Protection Technology and Recording Method Certifications: Vidi Recordable DVD Protection System*, MB Docket No. 04-60. A copy of a November 4, 2004, Notice sent by DTLA to its Adopters concerning this approval is submitted herewith for your convenience.

Very truly yours,

/s/

Seth D. Greenstein
